

Your total supplier of work lighting for the professional automotive workshop

Order SCANGRIP LIGHTING work light from your local distributor

BRIGHT INNOVATION

MAG high-powered rechargeable work lights

Flexible lamp head tilts up to 180 degrees
Place anywhere you want with the three strong built-in magnets and two retractable suspension hooks
230V AC battery charger. 4 hours charging time

MAG LED work light and torch in one

Main light with 21 high bright LEDs offering up to 4 hours continuous light. Spotlight with 5 high bright LEDs offering up to 15 hours continuous light.
1200mAh Li-on rechargeable battery

03.5004

MAG-UV LED work light with UV-light on the top

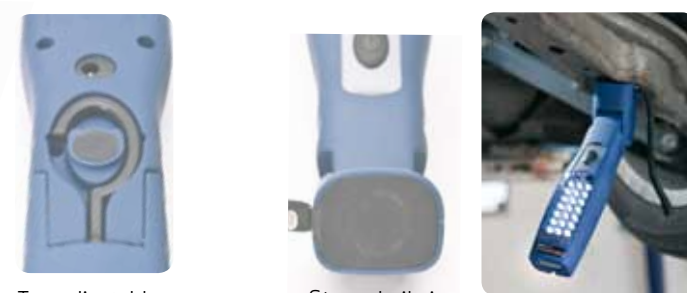

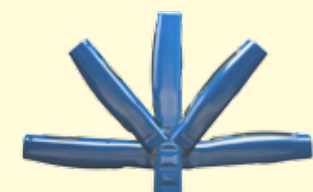

Ultraviolet light is used for leak detection in air-conditioning systems by means of trace elements.
Replaces special UV detection lights
2-in-1 lamp
1200mAh Li-on rechargeable battery

03.5008

MAG2 ULTRA HIGH POWER LED work light and torch in one

Main light with 2 ULTRA HIGH POWER LEDs offering up to 5 hours light
Spotlight with 5 high bright LEDs offering up to 24 hours light
2100 mAh Li-on rechargeable battery

03.5009

Two adjustable suspension hooks

Strong built-in magnet

MAG2

Rec. price € 69,-

MAG-UV

Rec. price € 59,-

FLEX Rechargeable LED work light and torch in one

Flexible lamp head tilts up to 120 degrees
Built-in magnet and metal hanger for suspension
Compact design for areas that are difficult to access

Main light with 18 high bright LEDs offering up to 3 hours light
Spotlight with 5 high bright LEDs offering up to 5 hours light
Rechargeable battery 3,6V - 1000mAh Li-on
230V AC battery charger
4 hours charging time

03.5000

Rec. price € 39,-

SUN extremely sturdy and rechargeable ULTRA HIGH POWER LED lamps

Reliable, efficient induction charging technology. Eliminates charging problems caused by short circuits, oxidation, dirty contacts etc. No contact with live components. The SUN lamps are waterproof (IP68) and resistant to oil and chemicals and are therefore ideal for daily maintenance in the workshop

SUN FLASH Extremely powerful flashlight with 3W CREE LED

Up to 5 hours light output with 210 lumen
Two-step options for light output: Step 1 = 100%
Step 2 = approx. 2/3
1200 mAh Li-on rechargeable battery
5 hours charging time

03.5112

SUN ULTRA HIGH POWER LED work light

With 3 white advanced high performance LEDs
Up to 3 hours light output.
Spotlight offering up to 8-10 hours light output
Adjustable, retractable suspension hook
2400mAh Li-Polymer rechargeable battery
3,5 hours charging time

03.5002

Sturdy and shock proof

The SUN light is of very high quality and the shock proof construction is so strong, that it withstands being driven over by a vehicle

SUN FLASH

Rec. price € 104,-

SUN

Rec. price € 104,-

FLASH a brand new range of sturdy and powerful flashlights

Developed for the rough environment of the professional work shop. All 3 flashlights are waterproof (IP54)

FLASH PEN Indispensable and extremely powerful 1W LED pencil flashlight in an elegant design

Super powerful light beam with an output of 80 lumen for up to 8 hours
2 x AAA batteries included

03.5100

FLASH3 Sturdy LED flashlight with 3W CREE LED

Super powerful light beam with an output of 170 lumen for up to 6 hours
2 x C batteries included

03.5103

FLASH1 Small sturdy LED flashlight with 1W CREE LED

Super powerful light beam with an output of 120 lumen for up to 8 hours
3 x AAA batteries included

03.5101

FLASH PEN

30 m

Rec. price € 24,-

FLASH3

110 m

Rec. price € 39,-

FLASH1

60 m

Rec. price € 24,-

FIX powerful bonnet lights

Adjustable telescopic holder (1.2 - 1.7 m) with soft cover protecting the painting of the vehicle
Easy and flexible positioning during work. Suspension hook for storing
Sturdy polycarbonate cover
Waterproof (IP54)

FIX-R Rechargeable and cordless with 8 ULTRA HIGH POWER white LEDs

Up to 3 hours continuous use with constant light output
230V AC battery charger
3300mAh Li-on rechargeable battery
4-5 hours charging time

03.5007

FIX-C With 8 ULTRA HIGH POWER white LEDs and power cable

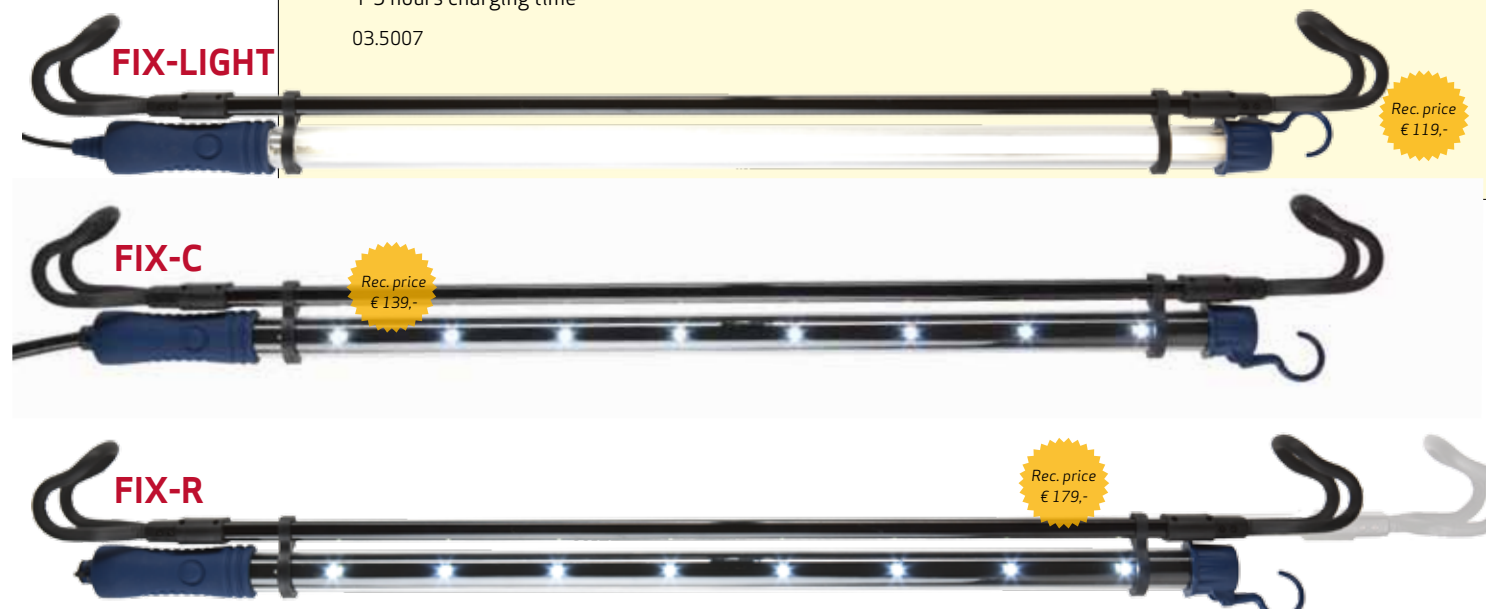

230V AC operating voltage
5 m cord

03.5017

FIX-LIGHT With 39W fluorescent tube

Easy replacement of tube
230V AC operation voltage
5 m cord

03.5027

1.2 - 1.7 m

QUATTRO T-55 Strong and professional 55W work light

Designed for both indoor and outdoor use
Place the lamp in the desired angle using the flexible stand or use it as a hanger

Carrier handle and 2 pcs of AC outlets on the back
No fire hazard due to low temperature on the surface of the lamp
Possible to replace fluorescent tube

Strong rubber protection frame (IP44)
5 m strong cord
230V AC operation voltage

03.5020

Rec. price € 89,-

STARLIGHT Inspection work light with 11W fluorescent tube

Super bright illumination of the working area
Ergonomic and user-friendly rubber handle
Adjustable suspension hook
Easy replacement of tube

Sturdy polycarbonate cover
Waterproof (IP54)
230V AC operation voltage
5 m cord

03.5005

Rec. price € 39,-

STARLED ULTRA HIGH POWER LED inspection work light

With 3 white high performance ULTRA HIGH POWER LEDs of the new generation, projecting a powerful white and natural light.
Super bright illumination of the working area
Toggle between main light and spotlight
Ergonomic and user-friendly rubber handle
Adjustable suspension hook

Sturdy polycarbonate cover
Waterproof (IP54)
230V AC operation voltage
5 m cord

03.5006

Rec. price € 59,-

ACCESSORIES

Rec. price € 14.50

MAGNETIC HOLDERS

The SCANGRIP LIGHTING series includes two universal holders for flexible hanging of all lamps

MAGNETIC CLIP HOLDER

May be fixed firmly everywhere either with a sturdy plastic clip or an extra strong magnet

03.5018

MAGNETIC HOLDER

Tailored holder with a powerful magnet. With a soft rubber surface protecting against scratches

03.5028

Rec. price € 14.75

Car adapters:

03.5019 12V DC for FLEX € 4,50
03.5013 12-24V DC for MAG, MAG2 AND MAG UV € 6,00
03.5014 12-24V DC for FIX-R € 9,50

Fluorescent replacement tubes:

03.5016 11W for STARLIGHT € 4,50
03.5015 39W for FIX-LIGHT € 8,95
03.5021 55W for QUATTRO T-55 € 9,00

Tripod stand for QUATTRO T-55:

03.5023 Tripod stand, Height 1.1-2.75m € 72,00

Incl. two brackets for one and for two lights

The right light is your best tool

It is important to choose the correct work lighting that suits your work tasks. The three most important selection criteria are lighting characteristics, functionality and sturdiness.

The SCANGRIP LIGHTING programme includes lamps with three different light sources:

Fluorescent tubes

Traditional fluorescent tubes provide a strong white light that is suitable for all kinds of work lighting. The light angle from the lamp is 180 degrees and the direction can thus be set without dazzling. The theoretical lifetime for fluorescent tubes is 5-10,000 hours, but in practice, the lifetime is considerably shorter as the light is typically used in rough working environments, where it is dropped or exposed to blows and shocks. For this reason, fluorescent tubes have the weakness that they often have to be replaced.

LEDs

Are suitable wherever there is a need for extra spotlighting in areas that are difficult to access. The light angle from the LEDs is approx. 30°. Limited light diffusion, but high light intensity in return. The LEDs have a lifetime of at least 50,000 hours and they are incredibly resistant to shocks and blows, which means that the effective lifetime of the LEDs goes far beyond the normal lifetime of the lamp. SCANGRIP uses the latest generation of LEDs that project a white light, unlike traditional LEDs that project a bluish light. The LEDs' power consumption is substantially lower than that of fluorescent tubes.

ULTRA HIGH POWER LEDs

Particularly advanced super diodes based on the latest technology and, in addition to their exceptionally long lifetime of up to 100,000 hours, they are characterized by the following qualities:

Natural light

Projects a very intense, white and natural light – similar to day-light, unlike traditional LEDs that project a fairly cold bluish light. They are, therefore, particularly suitable for repair work where it is important to recognize the correct colours on colour-coded wires, pipes, cables and assemblies.

Light intensity

Each 1W power diode has a light output 20 times stronger than traditional LEDs.

Excellent light diffusion

The ULTRA HIGH POWER LEDs offer significantly more light diffusion than traditional LEDs. The light source diffuses the light at an angle of up to 80 degrees and thus lights up a far larger area than traditional LEDs.

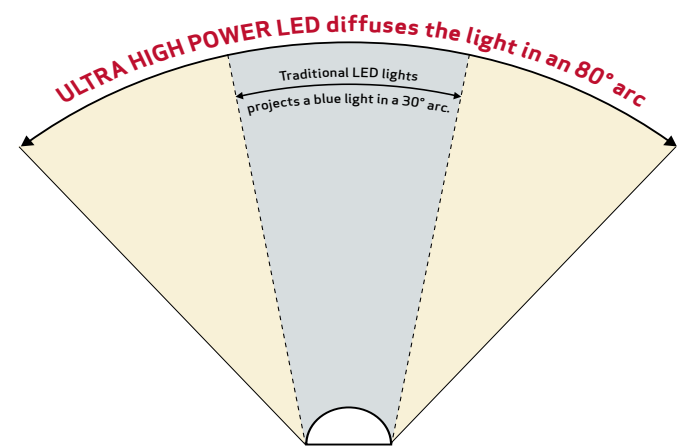

Innovation and technology

The best tools are characterized by bright design and functionality as well as great sturdiness, which enable them to withstand even the most demanding work environment.

SCANGRIP also offers lights that make use of a new, effective and reliable induction charging technology. Electrical contact is entirely avoided and charging problems, caused by dirty oxidized chargers or short-circuits, are eliminated.

Lifetime guarantee

Diodes in lights with ULTRA HIGH POWER LEDs come with a lifetime guarantee. The lifetime of the LEDs is up to 100,000 hours, which is equivalent to 90 years with 5 hours' daily use. SCANGRIP therefore provides a lifetime guarantee on the actual diodes.

SCANGRIP LIGHTING - a bright success

Vision, dynamics and innovation take SCANGRIP LIGHTING to new heights and SCANGRIP is now presenting a new, expanded range of innovative work lamps for the modern workshop.

It is SCANGRIP's goal to deliver at any point the best and most innovative range of work lights and the lamps are developed constantly using state of the art technology. Furthermore, SCANGRIP pays extra attention to developing the design and functionality of the lamps giving the mechanic the best conditions to perform his daily work fast, safe and efficient.

Innovation is the path

Since 1906, SCANGRIP has been manufacturing hand tool of very high quality for the industrial and automotive sectors. The product range comprises a series of innovative products, which have made the company known all over the world.

SCANGRIP holds a strong position in the Danish market and has a 85% export share. Now SCANGRIP is also having great success as a key supplier of work lighting for the professional workshop. Through acquisitions, we sustained substantial technical know-how and we aim to become the preferred total supplier of innovative work lights.

SCANGRIP's products are distributed through a worldwide network of tool importers, distributors and wholesale dealers.

"I've always had a passion for light and have been working with development and manufacturing of lighting since the early 90s.

Recently SCANGRIP LIGHTING sales took off and our customers launch our new lamps in their markets with great success.

SCANGRIP LIGHTING is now one of our most important business areas. We take great pride in matching the market demands and thanks to our determined and hard work on product development. I am confident that also in the future, our customers and we will have great success with the blue work lights."

Anders Barring
Company owner and Managing Director

BRIGHT INNOVATION

The work light of the future

SCANGRIP LIGHTING - only daylight is better

SCANGRIP presents an updated and complete range of work lights for the professional automotive workshop

See all the new work lights that give you natural light · intense light · excellent light diffusion

Quality all the way...

SCANGRIP lights are of a very high quality, they are extremely strong and sturdy and resistant to water, oil and chemicals.

Some of the lights even have a sealed rubber surface which makes them completely waterproof and IP68 classified. The construction of these lights is so resistant to shocks that they can withstand being run over by a vehicle.

SCANGRIP LIGHTING pictograms

The lighting source and other technical specification of the individual lamps will be illustrated by these simple, stylized SCANGRIP LIGHTING pictograms:

Packaging

All SCANGRIP are delivered in boxes with 4-colour print. The new flashlights are delivered in an exclusive gift box with a 4-colour leaflet presenting the SCANGRIP LIGHTING range
