

Complete range of high quality coil spring compressors for all needs

Solutions for improved safety in the professional workshop

CANVIK ONE

One for all – one and only in the market with only one pair of jaws for all cars

CANVIK ONE is applicable for all McPherson struts using only one pair of multi-purpose jaws.

The innovative shape of the jaws fits all springs regardless of size and pitch.

The high-tech protective insert improves safety considerably forming itself around and gripping the spring firmly preventing it from slipping from the jaw. In addition the insert protects the spring from scratches and corrosion.

Max Load 2500 kg

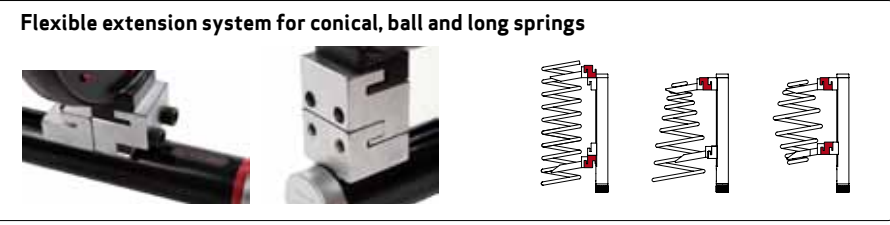

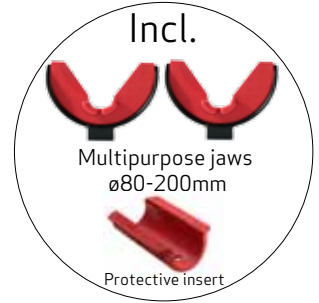

5 MONTHS PAYBACK TIME

80-200mm

40-396mm

€ 670 Gross price 10.0001

Safe and easy clamping in the bench vice with tailor-made protective unit

CANVIK PLUS

Easy-to-use high quality coil spring compressor

CANVIK PLUS is one of the most user-friendly coil spring compressors in the market.

A built-in protective unit made from hard-wearing polyurethane makes it safe to clamp the spring compressor in a bench vice.

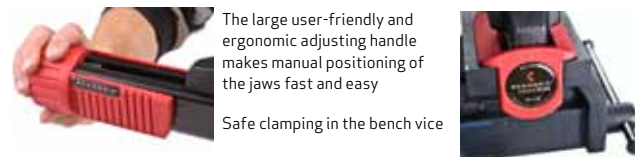

Max Load 2250 kg

3 MONTHS PAYBACK TIME

80-195mm

€ 460 Gross price 11.0001

CANVIK BASIC

Competitively priced high quality coil spring compressor

CANVIK BASIC is very competitively priced and makes the dismantling of McPherson struts both necessary and easier compared to using a traditional tool.

Max Load 1500 kg

2 MONTHS PAYBACK TIME

80-195mm

65-351mm

€ 355 Gross price 12.0001

CANVIK CENTER

State-of-the-art coil spring compressor for wishbone/multilink suspension

CANVIK CENTER is the only universal coil spring compressor in the market for this kind of suspension with angled, specially designed jaws improving safety and providing maximum functionality.

Max Load 2500 kg

3 MONTHS PAYBACK TIME

60-120mm

70-167mm

€ 495 Gross price 13.0001

The unique safety torque key is specially developed to prevent overload and never previously seen

The design of CANVIK CENTER is very compact, making it possible to use the tool on cars with very small hole in the rear spring control arm down to ø30mm.

This makes it one of the only tools in the market capable of handling for instance VW Touran, Citroën C3, Skoda Octavia, and Peugeot 107.

SUPPLEMENTARY JAWS

90.0010	ø80 -145 mm	€ 52.80
90.0020	ø145 -195 mm	€ 59.40
90.0030	ø140 - 175 mm	€ 96.50
90.0040	ø180 - 230 mm	€ 81.70
90.0050	ø80 - 120 mm	€ 62.40
90.0060	ø80 -145 mm *	€ 71.10

* Extended for ball and conical springs

SPECIAL JAWS

90.0070	For BMW E39, E46, Renault Megane II and Toyota Avensis	€ 140.70
90.0080	For Mercedes C-class	€ 107.70
90.0090	For Mercedes E-class and Renault Megane II	€ 107.70
90.0100	For Peugeot Break and Citroën C15 (pair)	€ 129.50
90.0120	For Chrysler Voyager "counter clock" spring	€ 116.90

CANVIK ONE

Integrated workstation for CANVIK ONE coil spring compressor

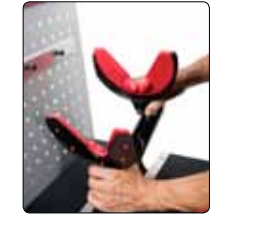

CANVIK ONE workstation improves safety and workshop efficiency considerably. All necessary tools and accessories for replacing struts are available at the workstation making work much easier and faster.

The workstation is designed to avoid non-ergonomic and inconvenient working positions.

It is supplied with a compact heavy duty safety cage, efficient and easy to use.

€ 1652 Gross price 10.0002

The workstation offers the operator complete flexibility: the CANVIK ONE coil spring compressor is simply attached to the workstation in a slide rail and, if the job in question demands it, it may easily be detached

The workstation is easily operated from the worktop with a powerful, built-in electric motor

CANVIK ONE workstation wall mounted

CANVIK SAFE

Protection device for improved safety

CANVIK SAFE is a simple and heavy duty protection device which improves the safety considerably and minimizes the risk of injuries when working with coil spring compressors.

CANVIK SAFE is a flexible solution for bench or wall mount, and fits both CANVIK BASIC and CANVIK PLUS coil spring compressors

€ 149 Gross price 15.0001

CANVIK APOLLO

New pneumatic coil spring compressor station

CANVIK APOLLO improves workshop efficiency considerably for only a limited investment.

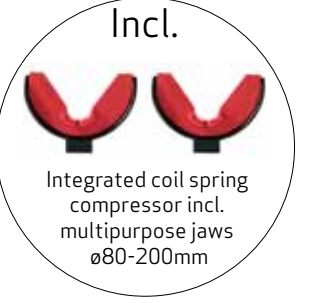

The station is very user-friendly and easy to operate, you simply turn handle left or right to select compression or decompression.

The height adjustable support for the strut is also designed as storage facility for tools, accessories and loose spare parts.

The compact and heavy duty safety cage ensures maximum work safety.

€ 895 Gross price 10.0050

The unit is mobile and easily and quickly moved around in the workshop

A foot pedal insures hands free operation which enables safe and flexible use

CANVIK coil spring compressors - a safe investment

The right choice when requiring a specialized tool and maximum safety at an attractive price

SCANGRIP
SAFETY CONCEPT

Your guarantee for quality and safety

Dismantling of McPherson struts can be a dangerous operation. It involves extreme forces disengaging the spring and very serious accidents might occur if the right tool is not used with all recommended precautions.

During development and production of the CANVIK coil spring compressors safety is our highest priority and all products are designed to endure extremely high loads.

The jaws are secured with strong bolts and equipped with a lip locking the spring during compression in order to improve safety. The surface of the jaws is powder coated in order to protect the springs from scratches.

CANVIK coil spring compressors are carefully tested and manufactured under very strict quality control. Only the very best materials are used to ensure a robust, strong and efficient construction of the tool.

Risky operation - Maximum safety

In order to ensure maximum safety the CANVIK coil spring compressors are equipped with a safety pin to prevent overload.

An air ratchet can be used on the spindle. To avoid overload use max. 180 Nm.

The CANVIK CENTER is supplied with a unique safety torque key preventing overload when using an air ratchet.

The load capacity of the CANVIK coil spring compressors exceeds by far the typical requirements of any workshop. A CANVIK coil spring compressor will manage all tasks, ranging from SMART to BMW X5 - and more. Read more about the application and capacity of the individual coil spring compressors at www.scangrip.com.

Quality Tools Made in Denmark

CANVIK coil spring compressors are manufactured at our own production facilities in Denmark by skilled, dedicated personnel.

We are therefore proud to mark our products with the quality stamp "Made in Denmark".

2
MONTHS
PAYBACK TIME

TÜV Approved Safety

The majority of CANVIK coil spring compressors are TÜV approved to sustain even extremely high loads (4 times safety factor).

The TÜV certificate is the ultimate quality stamp for this kind of products and is acknowledged throughout the world as a guarantee for safety. On a yearly basis, our production facilities are inspected and certified by the TÜV authorities to ensure that the facilities meet the requirements to a faultless and homogeneous fabrication as stated in the TÜV testing and certification rules.

Apart from being TÜV certified the CANVIK coil spring compressors have achieved the Russian GOST certification.

An economical solution - even in the long term

With the CANVIK coil spring compressors dismantling of springs and struts is both easier and faster and compared to using a traditional tool, they make the operation much faster giving a considerable saving in working hours.

SCANGRIP has introduced the concept "Payback Time" which estimates how long payback time the customer can expect when purchasing the product in question. The premisses for our calculations depend on the type of tooling and are based on some general assumptions for the time used for the actual operation.

This is an example of how the calculation has been made: With CANVIK BASIC 17 minutes are saved with each operation of removing the spring from the strut compared to using a traditional tool (two spindles with hooks). Assuming that the tool is used five times a month, the recommended sales price is 355 €, and one man/hour=60 €, results in a payback time of 2 months for this product.

Competitive price

Compared to similar high quality products, CANVIK coil spring compressors are the most price-competitive in the world offering the best value for money.

The CANVIK workstation and safety solutions improve workshop efficiency considerably at only a limited investment.

Innovative Danish Manufacturer of Quality Tools

Since 1906, SCANGRIP has been manufacturing hand tools of very high quality for the industrial and automotive sectors. The product range comprises a series of innovative products, which are known all over the world for design, innovation and considerably user-friendliness. Due to simplification and innovation we create unique tools which make work easier and safer for our customers.

It is SCANGRIP's goal to deliver at any point the best and most innovative range of special tools. Furthermore, SCANGRIP pays attention to developing the design and functionality of the products giving the mechanic the best conditions to perform his daily work fast, safe and efficient.

Recently, SCANGRIP has established itself as a leading supplier of work lights under the SCANGRIP LIGHTING brand.

Financially, SCANGRIP is in a very stable and strong position and is triple A rated (AAA = Credit risk zero).

SCANGRIP's products are distributed through a worldwide network of professional tool importers, distributors and wholesale dealers.
