

# NOVA 10K

## Extremely powerful 10,000 lumen COB LED work light with WIRELESS light control

Original NOVA work light - now in a new and even better generation.

NOVA 10K is the most powerful SCANGRIP lamp on the market providing up to 10,000 lumen, making it THE work light for even the most challenging and demanding working operations.

The new light dimmer function makes it possible to adjust the light into five different levels. The new NOVA design is elegant, with an integrated carrying handle and a new stand for direct mounting on the SCANGRIP TRIPOD.

The sturdiness of the new NOVA 10K makes it endure the rough, wet and dirty environment at the construction site, and can be used for outdoor work under all kinds of weather conditions.

The unique COB LED technology delivers extremely high light output, with a uniform and completely even illumination. The CRI value is close to that of daylight, and the NOVA housing is made of a robust diecasted aluminum, resistant to strong strokes, shocks and vibration - perfect for a working environment.

With the integrated WIRELESS light control feature you can easily control up to four work lights. WIRELESS light control also makes it possible to turn on/off the lamp and adjust the light output to suit the work task in question.

The WIRELESS light control application is perfect when working with one or more hard-to-reach lamps, for example positioned on the SCANGRIP TRIPOD.

**WIRELESS** 

**Light Control**

- Turn on/off
- Dimmer function
- Control up to four work lights
