

I-MATCH 4

Rechargeable CRI+ LED headlamp with ALL DAYLIGHT

ORIGINAL
SCANGRIP

SINCE 1906

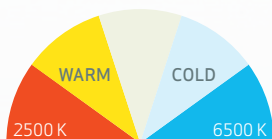

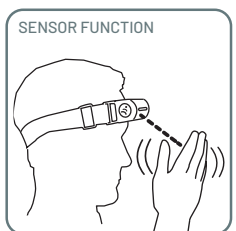

I-MATCH 4 is the perfect headlamp for hands-free lighting and has exceptional colour rendering properties of **CRI+** creating ideal conditions for detailing and colour matching tasks.

The headlamp provides 250 lumen with a uniform light that illuminates your entire field of view. Compared to the previous model, I-MATCH 4 has an improved user interface for CCT control and sensor activation. In sensor mode, you can easily see when the sensor is activated and turn the light on/off by waving your hand in front of the lamp. Featuring an ALL DAYLIGHT function, the headlamp offers 5 different colour temperatures depending on the task at hand. By pressing the CCT button on the side, you can change the colour temperature from 2500 to 6500 K, and the setting is indicated by the diodes on top of the headlamp.

The headlamp also includes a stepless dimmer function that allows you to adjust the light output between 10% and 100%.

I-MATCH 4 is designed with advanced power management and battery protection features that let you charge the battery while running the lamp on USB power. It also has low battery warning. The headlamp has a lightweight, durable, and sleek design that is both dust and waterproof (IP65).

For extended operating time, you can use the SCANGRIP POWER BANK 03.5962 as an optional accessory. Attach the power bank to the headband using the flexible clip holder provided and connect the cable to the headlamp.
