

# SCANGRIP WHEEL STAND

For mobile light positioning

The SCANGRIP WHEEL STAND is developed for mobile positioning of the work light in the detailing workshop. It makes it easy to move the light to where you need it, and at the same time you avoid uncomfortable and heavy lifting from one workplace to the other.

It is extendable from 0.9 m/3 ft to 1.9 m/6.2 ft and the base is equipped with 5 wheels for stability and easy maneuverability. The wheels are sturdy and of high quality and roll easily even on uneven surfaces. 2 of the wheels are lockable to secure a safe and fixed position.

The SCANGRIP WHEEL STAND now comes with a quick mount top fixture, enabling fast and easy positioning of the work light. When mounted, the light can be tilted to provide the optimum beam angle, and when the job is done, the WHEEL STAND can easily be put aside.

As an additional feature, it comes with a flexible bracket that enables you to easily position a second work light to illuminate from below. The extra mounting bracket is adjustable in the height and provides complete flexibility to position the light in the optimum height. When working on the side of the car or doing prep work at the panel this dual light option provides perfect, shadow free illumination from the upper side as well as from the underside.

The SCANGRIP WHEEL STAND is made of durable and sturdy powder coated steel for both indoor and outdoor use.

Dual bracket (03.5308) for positioning of two lamps available as accessory.
