

MAG PRO WIRELESS

Wireless rechargeable LED hand lamp

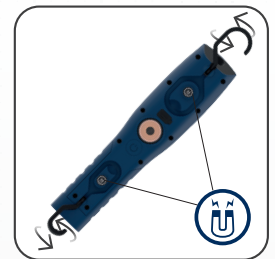

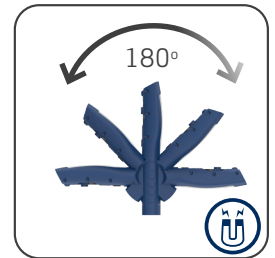

The MAG range is Europe's bestselling work lights and now the popular MAG PRO comes in a version with the option of wireless charging using the accessory SCANGRIP CHARGING PAD 03.5928, which can be purchased separately.

The charging pad is designed so that the work light automatically "slides into place" over the powerful magnets on the back. This means that MAG PRO WIRELESS can be charged also in a vertical position. The charging plate is prepared for fixed mounting in the workshop. Simply remove the two plugs and mount the pad with two 4 mm screws.

MAG PRO WIRELESS is made for efficient workshop operation through complete flexibility using the three strong built-in magnetic holders and the two retractable suspension hooks. This provides for flexible placement of the work light wherever you need it. The modern design of the MAG PRO WIRELESS offers an ergonomic and userfriendly grip, and the flexibility of the lamp head allows tilting up to 180 degrees.

MAG PRO WIRELESS can also be charged by the USB charging cable included.

The MAG series consists of universal and powerful multipurpose work lights that all professional users must have!
