

NEW

MULTILIGHT FLEX CONNECT

New flexible concept of hand-held work light with multiple, exchangeable light heads

The new high-performance MULTILIGHT CONNECT concept is based on the idea of combining a basic handle as known from power tools with a range of different work light heads which can be used and exchanged according to different applications.

MULTILIGHT CONNECT provides you with complete freedom to choose and tailor exactly the work light solution you need. Either you choose the MULTILIGHT BODY CONNECT handle and combine it with a selected light head, or you choose to acquire the body and more individual light heads to obtain a work light solution covering different purposes. Due to the flexible part of the body, all light heads can be adjusted at an angle of 120°.

Smart functionality

To ensure maximum functionality of the work light the body is equipped with a new invented, flexible mounting system. The system provides a combination of a bracket, a hook, and a magnet in one unit. The strap is made of polyurethane which is both flexible, and durable with a smooth surface. By the snap hook at the end of the strap, you can lock and fix the work light to any position. In the same way, the integrated magnet can be used to mount the work light body on any metallic surface available. The magnet is extremely powerful with a force strong enough to hold both body, light head, and battery.

Built-in strap with strong magnet and hook for suspension

JUST CONNECT

Add the connector matching your battery pack

Use SCANGRIP POWER SUPPLY for direct power

MULTILIGHT CONNECT is compatible with METABO/CAS battery system 18 V and all other 18 V/20 V battery packs from leading power tool brands by using the SCANGRIP CONNECTOR. In addition, the SCANGRIP POWER SUPPLY can be used for direct power providing unlimited availability of light.

BATTERY, CHARGER, CONNECTORS AND POWER SUPPLY ARE SOLD SEPARATELY
