

MAG PRO WIRELESS

Rechargeable LED hand lamp with wireless charging pad

MAG PRO WIRELESS with AUTOLight delivers light exactly where and when you need it, built around a grab-and-go workflow. Lift it from the charging pad and it turns on. Dock it and it turns off. If the power goes out, it switches on immediately. It always starts in Main Light, and you can change modes at any time while AUTOLight stays active. The AUTOLight is an optional feature that you can easily turn on or off, depending on your preference.

Positioning is fast and reliable. Three strong built-in magnets and two retractable hooks let you position the light hands-free on a lift, a steel beam, or inside a cabinet, whether you're wiring, servicing machines, or working under a vehicle. The 180° tilting head lets you direct the beam precisely at a bench, inside an engine bay, or overhead in the workshop, the ergonomic grip supports controlled handling during extended tasks.

The included charging pad guides the work light to "slide into place" using the powerful rear magnets, and it charges even in a vertical position. For permanent, grab-and-go readiness, mount the pad with two 4 mm screws.

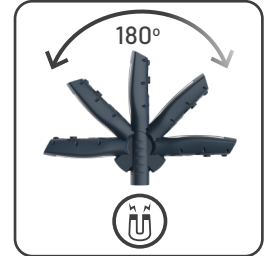

MAG PRO WIRELESS can also be charged by the USB charging cable included.

TECHNICAL SPECIFICATIONS

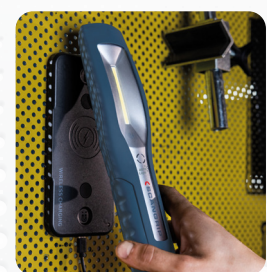

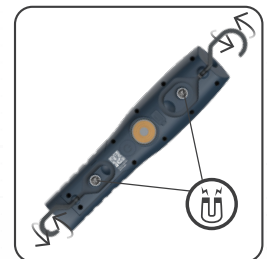

COB LED / Spot: High power LED
 60-600 lm / Spot: 150 lm
 1.5 -15 h / Spot: 3 h operation time
 4 h USB-C / 7 h wireless charging time
 3.7 V / 2600 mAh Li-ion-Battery
