

# SCANGRIP DIFFUSER MEDIUM

## Diffuse your SCANGRIP work lights

The light diffuser is designed to spread and soften the light providing increased functionality and new possibilities to adapt your work light even further to the specific work task.

The medium diffuser is incredibly smooth and lightweight. The strong built-in magnets make it easy and safe to mount the cover on your SCANGRIP lamp.

Together with NOVA R or NOVA 2 CONNECT work lights you can illuminate the entire work area, even into the darkest corner and soften the light avoiding hard shadows.

Together with the MULTIMATCH R work light it is especially applicable for checking high spots while coating, as well as car dent repair and detecting dust nibs on painting.

Fits:

03.5456 NOVA R

03.5658 MULTIMATCH R

03.6100C NOVA 2 CONNECT

- Mounted directly on top of the lens
- Illuminates the entire work area
- Diffuses and softens the light avoiding hard shadows
- Minimizes reflections and harsh light
- Reduces blinding

Easy and safe mounting with strong magnets
