

NOVA 2 CAS

2000 lumen handheld floodlight for CAS battery system

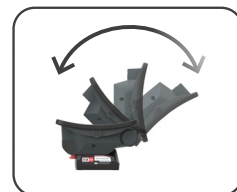

NOVA 2 CAS is a powerful compact all-round work light designed for the professional user.

The lamp features the latest high-performance COB LED technology and provides up to 2000 lumen. The built-in light dimmer function makes it possible to adjust the light into five different steps according to the work task. It is also supplied with display for battery capacity and lumen output level.

As a unique feature, NOVA 2 CAS is compatible with 12V - 18V METABO/CAS batteries, and at the same time, the SCANGRIP POWER SUPPLY can be used for direct power providing unlimited availability to light.

Due to the flexible stand and built-in hook, NOVA 2 CAS can be placed in different positions to obtain the desired lighting angle. As an extra feature, it has a built-in power bank with USB outlet to charge mobile devices.

The housing is made of sturdy die-casted aluminium and resistant to strokes, shocks and vibrations. The durable construction makes NOVA 2 CAS perfect for the demanding, rough working environment.
